

EXCAVATOR ROCKCUTTER

TF 600

DOUBLE DRUM ROTARY CUTTER FOR EXCAVATORS

Ideal for trenching, profiling and resurfacing, quarrying, demolitions, dredging and finishing operations.

FEATURES

STANDARD EQUIPMENT ON NZ MODELS

Hydraulic radial piston motor	Replaceable anti-wear plates
700mm wide drum	For weight between 9 and 16 tonne

Standard Tooth
For mixed materials

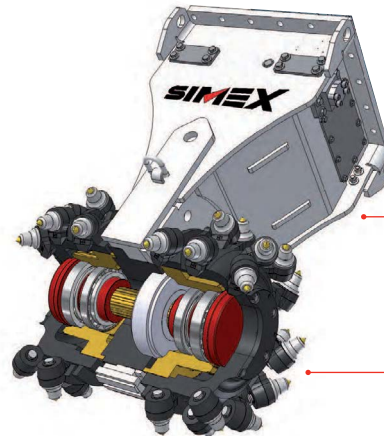

Hard Tooth
For milling very hard materials

Shaft transmits motion only and bears no load thanks to double support bearings for each drum perfectly protected from dirt and impact

Replaceable anti-wear plates

Cutter head can be rotated 90°

Gaskets fitted on drums seal against dust
