

Superstructure Group to become Controls and Data Services

Dear Customer,

On 30th June 2014, the Superstructure Group companies will become wholly owned subsidiaries of Rolls-Royce Controls and Data Services Limited, a new company formed by the merger of Optimized Systems and Solutions (OSyS) and Aero Engine Controls (AEC). This new group will trade as Controls and Data Services (CDS) and will continue to be wholly owned by the Rolls-Royce group.

We too will trade as Controls and Data Services (CDS), however the new legal names for each Superstructure Group company will change to:

Superstructure Group Limited → **Rolls-Royce Controls and Data Services (UK) Limited**

Superstructure Group A.P. Limited → **Rolls-Royce Controls and Data Services (NZ) Limited**

This is an exciting change for the business, as it will enable Superstructure to become part of a larger group that specialises in cross market data analysis solutions. This will provide us with the strength and depth to deliver innovation and product improvements at a faster pace, better supporting our customer needs.

Controls and Data Services will continue to deliver AQD, as **VisiumAQD**, identifying it with the current solution portfolio of the wider group. CDS products and services provide comprehensive safety & risk compliance management, operational efficiency (including fuel management) and equipment health management solutions for the aviation market.

During this transition our primary focus will continue to be our customers. We look forward to working with you as Controls and Data Services, continuing our aim to exceed your current and future safety management solution requirements.

The only administrative action arising from the name change will be to update your supplier/vendor records. Email addresses and contact telephone numbers will initially remain the same and a separate advice will be provided when there is a change. If you have any questions about the above, please discuss this with your current Superstructure Group account manager or send me an email and I will get back to you.

Yours sincerely

Ted Thomas
Director
