

We've had a meeting with MoT, CAA, Ministry of Education, Education New Zealand and Ministry of Foreign Affairs to further discuss issues the training sector is facing internationally through the absence of full Pt 141 and Pt 147 Rules in NZ. There has also been further interaction with Ministry of Education, NZQA and TEC about the Student Fee Protection Policy and AIRCARE. To round out the week, we organised an aviation team (MoT, CAA, Radiola Aerospace and Superstructure Group) to talk to a Ministry of Foreign Affairs and Trade forum on the growing aviation sector and the role they can play in its international development. NZ Trade and Enterprise has been involved in these initiatives behind the scene. This is showing some of the traction we are achieving through the One Industry and United Government Approach to the sector. Lots more to be done and we need outcomes but, we are 'on the road'.
