

*AIA has had quite a campaign over at the show with the 2007 one having the first NZ inc. group of 12 companies and then in 2009 a further 7. Of course this is in addition to the normal NZ exhibitors such as Safe Air. Most of you are telling us that you're now very established in Australia and the strategic challenges are further afield such as India, Indonesia and potentially some significant aviation infrastructure projects in the South Pacific.*
