ADSON TC TISSUE FORCEPS, TYING PLATFORM - 4-3/4"

Product Number: 51-3049

4-3/4" Adson Tungsten Carbide Tissue Forceps, Tying Platform, Serrated, 1x2 Teeth

Sklar® TC Adson Tissue Forceps are for holding and manipulating delicate tissues. Sklar permanently bonds tungsten carbide inserts to the instrument, which provides maximum control and precision for the user, as well as increasing the length of time the instrument will remain sharp. These forceps have a wide, flat thumb grasp area that is commonly slightly grooved for an improved grip. The jaws are short and the tips are narrow. These TC Adson tissue forceps, identified by gold handles, are straight with cross-serrated tips, 1 X 2 teeth, and a length of 4-3/4 inches.
