

Putting your heart in safe hands

Ormiston Hospital welcomes the **Auckland Heart Group**

Ormiston Hospital has welcomed the specialist cardiology group, **Auckland Heart Group**, to its Botany Junction facility, further improving services available to doctors, specialists and their patients throughout the South and East Auckland communities.

The **Auckland Heart Group**, New Zealand's largest and leading private cardiology group, has relocated its Botany Junction outpatient clinics to a ground floor suite within the hospital. The new location allows the Group to expand its current cardiology services and include inpatient cardiology assessments.

The **Auckland Heart Group** has 22 cardiologists working in an open team environment, sharing knowledge, experience and specialisation, in the assessment, diagnosis and treatment of the heart and its problems. They provide ongoing advice and support for patients, adults and children, throughout the Auckland region.

The cardiologists representing the South East communities are: Drs Ross Nicholson, David Heaven, Tim Sutton, Niels van Pelt, Ruvin Gabriel and Wil Harrison. These cardiologists, also working in Middlemore Hospital, support local GPs and patients with clinics at Ormiston Hospital, Counties Care in Papakura and centrally at Epsom.

Cardiology services available from the hospital include:

- Cardiology assessments, both outpatient and inpatient
- Exercise Treadmill Testing (ETT)
- Electrocardiograms (ECGs)
- Heart and Blood pressure monitoring
- Echocardiography including stress echos
- Vascular ultrasound (renal, carotid, abdominal aorta)
